CHAPTER 4

LEARNING OUTCOMES

1. List five different technologies used within a contact center.
2. Explain two customer benefits from contact centers using technology to improve service.
3. Explain two employee benefits from contact centers using technology to improve service.
4. Explain two company benefits from contact centers using technology to improve service.
5. Describe three benefits of customer relationship management software.
6. Discuss the pros and cons of contact centers becoming purely automated.

CONTACT CENTER SOFTWARE

Contact center operations software includes traditional dedicated telephone-based call center technology as well as computer systems integration and management tools.

These products integrate with customer relationship management (CRM) applications to access customer information and update customer records.

TYPES OF CALL/CONTACT CENTERS

- Outbound, inbound, blended and virtual call centers
- Domestic and international contact centers
- Offshore and nearshore contact centers

COMMON FEATURES OF CONTACT CENTER SOFTWARE

- Automatic Call Distributor (ACD)
- Call Recording
- Call Scripting
- Campaign Management
- Computer Telephony Integration
- Customer Relationship Management
- Email Response
- Intelligent Call Routing

COMMON FEATURES (CONTINUED)

- Interactive Voice Response
- Knowledge Management
- Predictive Dialing
- Quality Management
- Social Listening
- Texting Response
- Ticketing Software
- Time Division Multiplexing and IP - Internet Protocol

MORE COMMON FEATURES OF CONTACT CENTER SOFTWARE

- Trunk Circuit Networks
- TTY/TDD Communications:
- Web Chat
- Workforce Management

BENEFITS OF USING CONTACT CENTER TECHNOLOGY

Agent benefits include:

- increased productivity, accuracy, efficiency
- better time management
- possible promotions, recognition, and perks for a job well done

BENEFITS OF USING CRM TECHNOLOGY

- improved customer satisfaction, retention, and spending
- better internal communication
- more targeted and cost-effective marketing campaigns
- easier analysis of performance as a whole for improved decision making
- improved cross-selling and up-selling

FULLY AUTOMATED CONTACT CENTER

Automation can, for certain business processes, replace humans, but there are many things bots can't do.

A blend of automation and human service is the best choice.
